

THE EVOLUTION OF ARTIFICIAL INTELLIGENCE: 1936-2024

Turing machine conceptualized, foundational for computing.

Term 'artificial intelligence' coined at Dartmouth.

Deep Blue beats Kasparov, reviving AI interest.

DARPA Challenge spurs autonomous vehicle tech.

Google develops first autonomous car prototype.

AlexNet wins ImageNet with deep learning.

AlphaGo defeats Go professionals, surpassing human skill.

AlphaGo Zero - masters Go, defeating previous AlphaGo versions 100-0, self taught.

Open letter calls for pause on robust AI system development.

Stable Diffusion enables photorealistic image generation.

Google Bard launches as ChatGPT competitor.

AI matches humans in certain domains, says Nature journal.

Global focus on AI regulation for ethical, safe use.

Turing Test proposed, setting standard for AI intelligence.

First industrial robot, Unimate, starts on assembly lines.

Roomba vacuum introduces robotics to home appliances.

Honda's ASIMO humanoid robot serves in restaurants.

Siri launched as Apple's virtual assistant.

Facebook's DeepFace stirs privacy and AI ethics debate.

AlphaGo's victory over Lee Sedol in Go (4-1).

Microsoft's large AI model with 17 billion parameters.

LaMDA 2 enhances conversational AI realism.

OpenAI's GPT-3 changes the landscape of language models.

ChatGPT pushes conversational AI boundaries.

AlphaFold 2's breakthrough in protein folding prediction.

Watson wins Jeopardy, showcasing AI in games.
